End-Of-Life Notice – AirCard USB 301 & 302

May 4th, 2010

Sierra Wireless is announcing the End-Of-Life for the AirCard USB301 and USB302.

Only the volume identified by your Sales account manager in April for the next 6 months will be met. We will not be able to support any volume uptake from this forecast.
However, should you require a HSUPA device from Sierra Wireless, Compass888 and Compass889 are still available for sale, although at a premium compared to AirCard 301 and 302.

Sierra Wireless will continue to provide existing USB301 and USB302 customers with support and technical assistance on a reasonable commercial basis for a minimum term of 2 years after final sale (no later than August 20th, 2012).

We encourage our valued customers to ask about our currently available USB HSPA+ USB modem –AirCard® 310U or USB308- or to inquire about our renewed line of HSPA+ products coming out in Q4 2010.
We also encourage prospective customers to enquire about our next generation of Airlinks technologies coming out in the next 12 months (dual carrier HSPA+ and LTE).

We would like to thank all our existing customers for their support. If you have any questions, concerns, or are interested in learning how our other products can fill your needs, please contact your Account Manager, our Sales Desk, Customer Support Team or visit our web site at www.sierrawireless.com.

Sincerely,
SIERRA WIRELESS
Product Management Team
